Contra Costa Community College District Bid No. 4CD-82

CCC Autostacker Parking Lift

REQUEST FOR BIDS

ADDENDUM No. 2

The following information have been added to this project:

- It is preferred to have the lift surfaces galvanized.
- It is preferred to have cover weather proofing on the safety mechanism.
- 440 Volt/3 phase motor and controls is required.
- Water proofing the controls and motor is preferred.
- Supply panel should have individual circuit breakers. Four station boxes is ok.
- All outdoor wire connections should be water proof.

Question and Answer:

1. **Question:** Would you like these lifts to be galvanized?

Answer: Yes, it is preferred that the lifts be galvanized.

2. **Question:** Will the site be empty/free of cars during the project?

Answer: It can be arranged to have the area free of cars.

3. **Question:** Does Contra Costa have a forklift to unload the lifts or would you prefer we do?

Answer: The contractor is to arrange the forklift on their own.

4. **Question:** Please furnish a list of eligible companies that have completed a site visit. There were a total of two companies there today, does that mean only these two companies are eligible to bid?

Answer: The mandatory pre-bid meeting sign-in sheet have been uploaded. Only contractors that attended the mandatory pre-bid meeting are allowed to bid on this project.

5. **Question:** Is it necessary to be a BendPak/Autostacker Authorized Distributor and Installer? (Shows up on their Service Center Locator: <https://app.xtremelocator.com/custom/bendpak/search.php> ?)

Answer: It is not necessary to be authorized dealer.

6. **Question:** The approximate lead time for these units is 6-8 weeks upon receipt of order from the factory directly. Unfortunately there is no other way to procure these units. Please confirm that the College acknowledges these lead times.

Answer: 6 to 8 week lead time is ok.

7. **Question:** If I want to schedule a licensed electrician to come by prior to bid opening, can I still schedule that?

Answer: Yes, however, the fact remains that only contractors that were present at the mandatory pre-bid meeting are allowed to bid on this project.

8. **Question:** Please confirm if you'd want the singular power unit model (1 power to the entire setup), or 10 power unit model (10 separate power units, 1 for each lift). While slightly more expensive on line item 1, I think you'll save lots of money on electric.

Answer: One power unit for the whole set-up is ok.

9. **Question:** The electrician will certainly need a drawing/sketch. Is there one available?

Answer: No.

10. **Question:** Confirm if parts of the bid are severable (can one vendor win one part and one vendor win another)?

Answer: No.

Please make sure to acknowledge receipt of this addendum by marking the addenda/amendments acknowledgment portion of the signature page on **page 9** of the RFB.

All other facts and specifications to this bid remain unchanged.
