RE: Limited Pre-Renovation Asbestos and Lead Survey Report
Diablo Valley College – Liberal Arts Building
321 Golf Club Road, Pleasant Hill, CA
Terracon Project #: R1227072

Dear Mr. Areigat:

Terracon Consultants, Inc. (Terracon) conducted a limited pre-renovation asbestos and lead survey of the Liberal Arts building on the Diablo Valley College (DVC) campus located at 321 Golf Club Road, Pleasant Hill, California, on January 28 and February 4, 2022. The survey was performed in preparation for a scheduled renovation of the building that will include the following:

- Replacement of carpet and base
- Changing of door hardware
- Adding AV equipment
- Removal of chalkboards
- Painting of interior and exterior

Michael Reed, Certified Site Surveillance Technician (CSST) and California Department of Public Health (CDPH) certified Lead Sampling Technician, and Steffen Steiner, Certified Asbestos Consultant (CAC) and CDPH Lead Inspector/Assessor with Terracon, performed the surveys.

During the referenced survey event, one (1) of the five (5) suspect asbestos-containing materials (ACMs) sampled was found to contain asbestos upon analysis by polarized light microscopy (PLM). Table I below provides a summary of the asbestos sample results.

TABLE I – ASBESTOS SAMPLE RESULTS			
HM # / Material Description	Sample Locations	NESHAP Category	Results
01 / 4" Black cove base with beige glue	Rooms 116, 113 and 207	N/A	ND
02 / 2'x2' Carpet square glue	Rooms 116, 113 and 207	N/A	ND
03 / Drywall with joint compound	Rooms 207, 217 and 220	N/A	ND
04 / Red brick with grout	Room 207, 220 and 214	N/A	ND
05 / Drywall with joint compound at portico	2nd Floor north side portico ceiling	RACM	Joint Compound: 2% CH Drywall: ND

CH – Chrysotile, ND – None Detected, N/A – Not Applicable, RACM – Regulated Asbestos-Containing Material,
 Cat. II – Category II Non-Friable ACM

It should be noted that Terracon did not observe adhesives associated with the chalkboards or suspect insulation in the doors.

The asbestos samples were transported under chain of custody procedures to EMLab P&K (EMLab) in Tustin, California. The asbestos samples were analyzed by PLM techniques in accordance with methodology approved by the U.S. Environmental Protection Agency (EPA). As set forth in the Code of Federal Regulations, 40 CFR Part 763, Appendix A to Subpart F, Section 1.2 and 1.7.2.4, the lower limit of reliability detection for asbestos using the PLM method is approximately one percent (1%) by volume. EMLab's analytical report is provided as an attachment to this letter report, along with the chain-of-custody forms.

Friable ACM constitutes a Regulated Asbestos-Containing Material (RACM) and must be removed prior to start of demolition or renovation activities. Category I Non-Friable materials can be reasonably expected to be damaged and made friable during normal demolition activities and should be removed prior to start of demolition. Category II Non-Friable materials are likely to be damaged and made friable during demolition or renovation activities and must be removed prior to start of demolition. All removal of ACM materials including materials non-friable materials left in the building must be conducted by a licensed and registered asbestos abatement contractor in accordance with Cal-OSHA regulation Title 8 CCR Section 1529 and local air quality regulations.

It should be noted that only the materials specifically mentioned within this report have been surveyed by Terracon. Any additional suspect materials identified during the course of construction related activities should be assumed to be asbestos-containing until sampling is conducted to determine asbestos content.

Nineteen (19) samples of paint were collected from the building and analyzed for lead at EMLab in Tustin, California by Flamed Atomic Absorption Spectrometry (NIOSH 7082 & EPA 7000B). Table II below provides a summary of the lead sample results.

TABLE II – LEAD SAMPLE RESULTS			
Sample # / Sample Description	Sample Component / Substrate	Condition	Result (ppm)
Pb-1 / Red paint on metal door	Room 116 door exterior / Metal	Fair	620
Pb-2 / Gray paint on metal door	Room 116 door interior / Metal	Intact	500
Pb-3 / Green paint on metal door frame	Room 116 door frame / Metal	Intact	1,100
Pb-4 / Green paint on wood wall trim	Room 116 interior room trim / Wood	Intact	1,200
Pb-5 / White paint on wood wall	Room 116 NW corner / Wood	Intact	150
Pb-6 / White paint on wood ceiling	Room 113 ceiling / Wood	Intact	660
Pb-7 / Gray paint on metal column	Exterior near Room 115 / Metal	Intact	49,000
Pb-8 / Dark gray paint on wood wall	1 st Floor exterior east side / Wood	Intact	740
Pb-9 / Light gray paint on wood wall	1 st Floor exterior east side / Wood	Intact	160
Pb-10 / Dark gray paint on metal handrail	1 st Floor exterior SW handrail at stairs	Intact	1,600
Pb-11 / White paint on drywall portico ceiling	1 st Floor portico near Room 113 / Sheetrock	Intact	3,900
Pb-12 / Dark gray paint on wood barrier rail	2 nd Floor exterior walkway near Room 210 / Wood	Intact	<40

TABLE II – LEAD SAMPLE RESULTS			
Sample # / Sample Description	Sample Component / Substrate	Condition	Result (ppm)
Pb-13 / Gray paint on metal door	Room 207 door interior / Metal	Intact	480
Pb-14 / Dark gray paint on wood barrier wall	2 nd Floor exterior walkway near Room 218	Intact	<40
Pb-15 / Dark gray paint on wood wall	2 nd Floor exterior north side near Room 218 / Wood	Intact	<40
Pb-16 / White paint on drywall ceiling	2 nd Floor exterior north side portico / Drywall	Intact	1,100
Pb-17 / Red paint on metal door	Room 214 door exterior / Metal	Intact	660
Pb-18 / White paint on wood ceiling	Room 217 ceiling / Wood	Intact	1,600
Pb-19 / White paint on wood wall	Room 217 east wall / Wood	Intact	360

ppm – parts per million

The laboratory report and chain of custody documentation are provided as attachments to this letter report.

This report has been prepared on behalf of and exclusively for use by the Contra Costa Community College District for specific application to their project as discussed herein. The analysis and conclusions in this report are based upon data obtained during the hazardous materials sampling activities. The professional services provided and judgments rendered on this project are consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing under similar conditions in the same locale. Terracon does not warrant the work of regulatory agencies, laboratories or other third parties supplying information that may have been used in the preparation of this report. No warranty, express or implied, is made.

Limited Pre-Renovation Asbestos and Lead Roof Survey Report

CCCCD DVC – Liberal Arts ■ Pleasant Hill, CA

February 7, 2022 ■ Terracon Project No. R1227072

Terracon appreciates this opportunity to provide our environmental consulting services to the Contra Costa Community College District. If you have any questions or need additional information, please feel free to call me at 510-899-7005.

Respectfully,

Terracon

Steffen Steiner

Asbestos PLM: 02-01-2022

Service SOPs: Asbestos PLM (EPA 40CFR App E to Sub E of Part 763 & EPA METHOD 600/R-93-116, SOP EM-AS-S-1267)
NVLAP Lab Code 200757-0

All samples were received in acceptable condition unless noted in the Report Comments portion in the body of the report. The results relate only to the samples as received and tested. The results include an inherent uncertainty of measurement associated with estimating percentages by polarized light microscopy. Measurement uncertainty data for sample results with >1% asbestos concentration can be provided when requested.

Eurofins EMLab P&K ("the Company") shall have no liability to the client or the client's customer with respect to decisions or recommendations made, actions taken or courses of conduct implemented by either the client or the client's customer as a result of or based upon the Test Results. In no event shall the Company be liable to the client with respect to the Test Results except for the Company's own willful misconduct or gross negligence nor shall the Company be liable for incidental or consequential damages or lost profits or revenues to the fullest extent such liability may be disclaimed by law, even if the Company has been advised of the possibility of such damages, lost profits or lost revenues. In no event shall the Company's liability with respect to the Test Results exceed the amount paid to the Company by the client therefor.

The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by any agency of the federal government. Eurofins EMLab P&K reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified.

Inhomogeneous samples are separated into homogeneous subsamples and analyzed individually. ND means no fibers were detected. When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.

‡ A "Version" indicated by "-x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

November 02, 2021

Steffen Paul Steiner
147 Los Cerros Avenue
Walnut Creek CA 94598

Dear Certified Asbestos Consultant or Technician:

Enclosed is your certification card. **To maintain your certification, you must abide by the rules printed on the back of the certification card.**

Your certification is valid for a period of one year. If you wish to renew your certification, you must apply for renewal at least 60 days before the expiration date shown on your card. [8 CCR 341.15(h)(1)].

Please hold and do not send copies of your required AHERA refresher renewal certificates to our office until you apply for renewal of your certification.

Certificates must be kept current if you are actively working as a CAC or CSST. The grace period is only for those who are not actively working as an asbestos consultant or site surveillance technician.

Please notify our office via U.S. Postal Service or other carrier of any changes in your mailing or work address within 15 days of the change.

Sincerely,

Jeff Ferrell
Senior Safety Engineer
